

**What they do?**

**Early detection of multi-type of cancer** using AI technology in a non-invasive method with up to 99% accuracy.

**Problem**

With great stride made in cancer diagnosis and treatment, Cancer death remains, the second cause of death globally. **No reliable system has ever been designed for early detection** in a non-invasive, affordable with high level of accuracy.

**Solution**

**A proprietary, AI-powered (Machine Learning) Multiple Biomarkers Disease Activity Algorithms (MBDAA).**

- Diagnoses up to 50 types of cancer
- Up to 100% accuracy
- Non- invasive, through blood and Urine
- Affordable
- Fast test results

**Team**

A group of highly capable people with impressive histories and expertise. The management team includes experienced business executives who previously held top-tier executive and senior leadership roles at large multinational corporations.

**Funding**

**The company has raised \$14.3 M in seed and Series A funding** with a post-money valuation of \$129 million.

**Revenue Projection**

The company projects achieving **\$50 million in revenue in 2024.**

**Competitors**

- **GRAIL** acquired in 2021 for \$8 Billion (testing accuracy 20%)
- \_ **Thrive** acquired in 2021 for \$2.25 Billion ( does not detect malignant cases and cannot be used in pregnant women)

**ASK**

The founders and management team are inviting a strategic financial sponsor to collaborate on the launch of products in the U.S., Europe, and eventually worldwide. The founders are open to raising capital through equity and exploring various deal structures to achieve their objective.
